**STICKY
BUSINESS**

A smudged, smoky eye is one thing, but what if you're the kind of girl who just doesn't feel done without a leopard-spot or zebra-stripe eyelid? ColorOn's Professional Instant Eye Shadow Applicators (left, in Leopard Lounge and Sapphires & Golds), deliver instant shadow equivalents of fake tattoos, deliver instant drama but don't require the artistic ability of a drag queen or the steady hand of a cardiac surgeon. Press (right) on each single-use, mineral-powder pad; peel off; set with powder; et voilà. (But watch out for symmetry!) As for that eternal dilemma, what to wear with jewel-tone ombre eyes? We'll leave that one up to you.
